

Prompt input text for the header and footer

Give me a low fidelity wireframe mock design of a webpage that has a navigation header, on the left just add the text Logo. On the right side add these menus: Find People (add a search icon to its right), My Connections (add a person/people icon icon to its right), My Flights (add an airplane icon icon to its right), Profile (add one person icon icon to its right), and then on the right most add like a Sign Out icon. Add a footer also with just some sample text, align the text on the right side and try to make it in a single line.

Response

1. Navigation Header:

- The navigation header should be positioned at the top of the page and span the entire width of the screen.
- The background color of the header should be a dark shade of gray (#333333).
- The header should contain the following elements:
 - Logo: This should be positioned on the left side of the header and should be text-based. The font used should be sans-serif and the color should be white (#FFFFFF).
 - Find People: This should be positioned on the right side of the header and should be a clickable text link. The font used should be sans-serif and the color should be white (#FFFFFF). To the right of the text, there should be a search icon (a magnifying glass).
 - My Connections: This should be positioned to the right of Find People and should be a clickable text link. The font used should be sans-serif and the color should be white (#FFFFFF). To the right of the text, there should be a person/people icon.
 - My Flights: This should be positioned to the right of My Connections and should be a clickable text link. The font used should be sans-serif and the color should be white (#FFFFFF). To the right of the text, there should be an airplane icon.
 - Profile: This should be positioned to the right of My Flights and should be a clickable text link. The font used should be sans-serif and the color should be white (#FFFFFF). To the right of the text, there should be a person icon.
 - Sign Out: This should be positioned on the far right of the header and should be a clickable icon. The icon used should be a door with an arrow pointing outwards.

2. Footer:

- The footer should be positioned at the bottom of the page and span the entire width of the screen.
- The background color of the footer should be a light shade of gray (#CCCCCC).
- The footer should contain some sample text, such as "Copyright © 2021 Company Name. All rights reserved."

Prompt input text for the landing page - Find People

Show a list of users as cards stacked four of them horizontally, and the rest in the next line (show total of 12). Each card section holds the user's information such as their profile pic (show a round photo of a sample person in the middle), flight information (flight number, origin and destination, flight date and time) and description. Also, each card will have a connect button which allows the user to send sort of a 'friend request' to the other person, let's name it 'Connect' button.

Response

The user cards should be displayed below the navigation and should be stacked four of them horizontally, and the rest in the next line (show total of 12). Each card should include the following elements:

- Profile picture: This should be displayed as a round photo of a sample person in the middle of the card.
- User information: This should include the user's name, flight number, origin and destination, flight date and time, and a brief description. This information should be displayed below the profile picture.
- Connect button: This should be displayed at the bottom of the card and should allow the user to send a friend request to the other person. The button should be labeled "Connect".

Prompt input text for My Flights section

Show me a webpage that has a vertical list of information, each row has flight number, flight date and time, origin and destination, airline, duration and status (such as New, Delayed, Ongoing, Complete). Also, add an "Add" or Plus button to add a new entry. Show the new entry form similar to a list but with the appropriate field inputs and a Submit button.

Response

- The flights section should be the main section of the webpage.
- It should contain a vertical list of flights, with each row displaying the flight number, flight date and time, origin and destination, airline, duration, and status.
- The status should be displayed as a colored badge, with different colors representing different statuses (New, Delayed, Ongoing, Complete).
- Each row should have an Edit button and a Delete button on the right side.
- At the bottom of the list, there should be an "Add" or Plus button that opens the new entry form.
